

# The Omnirepo Manifesto

---

Knowledge trapped in heads is lost. Coordination is exhausting. Every alignment meeting is an hour stolen from creation.  
**Structure gives that time back.**

---

## 1. Structure Over Process

Alignment comes from shared context, not meetings. If you're coordinating manually, your structure is broken.

## 2. Everything Traversable

If AI can't read it, it can't help with it. No knowledge locked in heads, Slack threads, or tools that don't export.

## 3. History Preserved

Every change tracked. Evolution visible. AI understands not just what exists, but how it evolved and why.

## 4. Single Source of Truth

Each concept lives in one place. Everything else references it. Never duplicate. Always link.

## 5. Context at Every Boundary

Each domain declares how it works. AI reads these declarations before acting. No implicit knowledge.

## 6. Design for AI, Not Just Humans

Humans navigate. AI traverses. Optimize for both. Clear file names, consistent patterns, explicit relationships.

## 7. Orchestration at the Root

Cross-cutting workflows live at the top. One command, multiple domains, coordinated output.

## 8. Compound Over Time

Every document makes AI more capable. Structure is an investment. The returns accumulate.
